Blackberry passport whatsapp yukleme. Blackberry passport whatsapp 2020. Blackberry passport whatsapp download. Blackberry passport whatsapp support. Blackberry passport whatsapp 2022. Blackberry passport whatsapp apk. Does whatsapp work on blackberry passport. Blackberry passport whatsapp 2021.

RIM has been doing its part to keep the excitement and the anticipation levels high for the upcoming release of BlackBerry 10 next month. We have seen a lot of companies lining up to bring their applications to the new platform. Unfortunately, WhatsApp will not be one of those applications. WhatsApp is a nicely executed cross-platform instant messaging service that provides delivery confirmation. It also has proven to be a consistent performer and has about 20 millions users. The app is currently available across most smartphone operating systems, Android, iOS, BlackBerry 7, Windows Phone, even Symbian and Nokia S40. After receiving an inquiry about the upcoming BlackBerry 10 release, the response from WhatsApp said simply, "We have no plans to support BlackBerry 10 at the moment, sorry." Okay, so you see "at the moment" and think, "Well, that means they might support it later!" We do not want to rob you of that ray of hope, so hold on to it if you want to. Alas, as it stands now, at best case, WhatsApp will not be available when BlackBerry 10 launches. However, it is certainly reasonable to think that WhatsApp would develop their app for BlackBerry 10 if it proves to be the success that RIM says it will be. source: CrackBerry.com If you're still clinging on to your BB10-powered BlackBerry for dear life, then you might be displeased with the fact that WhatsApp is no longer supported officially on the BlackBerry platform (since 30th June 2017). The popular messaging app is similar to the now-defunct BBM (BlackBerry Messenger), a secured messaging service that is sent over an Internet connection. The company behind Whatsapp, however, is giving up on the BlackBerry 10 platform which has been slowly losing support from other app developers over the years. The move comes as a result of BlackBerry moving to Android, creating a secure software solution and handsets that run the Google operating system. While the company still supports its BB10 devices and plans to continue support for its government and corporate clients, users will need to switch to its latest Android handsets to enjoy a wider range of applications. For those sticking with the BB10 platform, there is, however, there are a couple of tricks that will allow you to keep WhatsApp running on your device. You won't be able to use an official app available on the BlackBerry World app store, but that's not that important since you will get roughly the same functionality as you'll have on an officially supported WhatsApp application. Because BB10 incorporated the Android runtime, the operating system can download Android apps. As long as these apps do not require Google Play Services, they can run reasonably well on a BB10-powered device. What BlackBerry Devices Does this Work On? Any device running BlackBerry 10 can install Snap and run Android applications. With older BB10 devices, applications may not run as smoothly as they would with the latest generation of BB10 devices. The following BlackBerry handsets run on BB10: Z10 Q10 Q5 Z30 Classic Leap Passport Passport Silver Edition If you're looking for a way that will allow you to use WhatsApp on BB10, we have some guides for you. Below you have a collection of methods that other users in a similar situation have used to get past the limitation and use WhatsApp Messenger normally. Feel free to follow whichever method seems more approachable in your particular scenario. Method 1: Downloading the modified WhatsApp APK If you're using BB10 version 10.3.3, you might be able to install the WhatsApp application by simply downloading it from an APK market. Keep in mind that the following method is not guaranteed to work on all BlackBerry BB10 devices, but some users have reported that this method was effective and the WhatsApp application is as stable as they come. Here's what you need to do: On your BB10 phone, open this link (here) with your default browser. You might also try your luck with a newer WhatsApp version, but this one is confirmed to work by several users. Download the WhatsApp app to your BlackBerry device, open it, and follow the on-screen prompts to install the Android version of WhatsApp on your BB10 device. Once the process is complete, reboot your BlackBerry device and open WhatsApp at the next reboot. If this method wasn't effective in allowing you to use WhatsApp on your BB10 device, move over to the next method below. Method 2: Downloading WhatsApp using Snap Before you start this method, it's important to understand what you are doing to your BB10 device. To download WhatsApp for BB10, you will need to install an unofficial application on your device called 'Snap'. This app gives you access to the Google Play Store, meaning you can search all the Android applications which are available for Android tablets and phones. This means that you will be going against BlackBerry recommendations. The app is widely used and has no reported security flaws, so there should be no problem for a casual BB10 user. Follow the guide down below to download Snap for your BB10 device and download the Android version of WhatsApp (as well as thousands of other official Android apps!). Plug your BB10 device into your computer. Don't worry about running any kind of BlackBerry software, like BlackBerry Link. Your device simply needs to be plugged in and turned on. The next step requires your computer to have the Google Chrome internet browser installed. If you don't have it, download it. If you do have it, open it up. On your Chrome browser and go to this link (here). This website will allow you to download Snap for free, though there is a suggested donation of \$2.99. Download Snap by clicking 'Get Snap' at the bottom of the page. Use the drop-down menu to choose how much you would like to donate if anything. If you choose not to pay, you will be sent to a page with a 'Download Now' button. Download Sachesi Firmware Now, you will need to download Sachesi firmware. This is available for both Mac and PC, and it allows you to take the .bar file, which contains Snap and put it into your BB10 device. Head over to where you will be given the option to download a Windows or OSX file. Once you have downloaded the file, extract the .zip file and open the app. It should look like this. Install Snap on Your Handset Take the Snap .bar file and place it on your desktop, or in an easily accessible folder. Then, make sure that Sachesi is open on the 'Install' tab, and then drag and drop the .bar file from Windows Explorer or your desktop to the Sachesi window. The process is exactly the same on OSC and Mac OS. Once you drop the .bar file into Sachesi, a progress circle will appear, showing that it is transferring the .bar file onto your handset. Once it has reached 100%, leave the app and don't change any settings. Pick up your BlackBerry device, and look for 'Snap Free' on your app screen. This is a circular icon with an Android and BlackBerry logo. Choose the app and open it up. You'll be asked to agree to give it permission to access certain features on your phone. You will also be asked to sign into your Google account. Simply type in all this information and you will be taken to the app home screen. Tap 'Browse Apps' and search for WhatsApp. When you find the official app, tap 'Download' and then choose 'Open Installer'. The next screen will offer you a disclaimer, explaining that the app is not coming from the official BlackBerry store, and will ask you if you want to install. Tap 'Install'. A window may appear entitled 'Allow App Installation', if you do not have the correct settings switched on. To install the app, click 'Settings' and then toggle 'Allow Apps from Other Sources' to be installed to the 'on' mode. The download and install will then resume again, and once it's complete, the app will open. Now, you can log in and set up the app and use it as normal! If this method was not effective in allowing you to install and use WhatsApp on your BB10 device, continue down with the next method below. Method 3: Running the BlackBerry World patch Another alternate solution is to download the WhatsApp version of Android and then apply the WhatsFixer BlackBerry World patch in order to resolve the sharing files issue and make the app usable again on BB10 devices. But keep in mind that this method will only work if you connect an SD card to your BlackBerry device. If you meet the requirements and you decide to apply this method, follow the steps below: Make sure your SD card is connected and uninstall the old WhatsApp version that you currently have installed. Visit this official link (here) from your BB10 phone and download the latest WhatsApp version for Android. Open the installer and complete the installation. When the box that warns you about the Google Play Services, tap outside of it. Visit this link (here), download the WhatsFixer patch and run it. Open WhatsApp and use it normally. If this method wasn't applicable in your scenario, move down to the final method. Method 4: Using WhatsApp via BB Hub A couple of users have discovered that you can actually trick your BB10 phone into using WhatsApp even after the official supported period has passed. This method involves changing the date and using WhatsApp through the BB Hub (not the WhatsApp icon). Here's a quick guide on how to do this: With WhatsApp closed, go to your Time & date settings and change the date to 1.1.2018. With the date altered, open WhatsApp from the icon in your menu, send some messages and make sure you get at least one reply. Minimize WhatsApp (don't close it) and change the date to your phone back to what it was. Communicate with your Existing Chats cont ONLY via the BB Hub. Avoid entering WhatsApp via the app icon because WhatsApp will become unusable again. If you mistakenly enter the WhatsApp application, repeat the steps above. download whatsapp for blackberry passport apk BlackBerry Hub + Services is the foundation upon which all your favorite BlackBerry applications are built. It provides both increased security and improved productivity. Key features include: download whatsapp for blackberry passport apk Learn about all BlackBerry Hub + applications\* Enjoy more common experience in your BlackBerry applications, including common menus that allow you to open items in other BlackBerry applications. Manages data for all BlackBerry Hub + applications, provides secure and efficient access to your important data. This includes logic links that receive your data from the Internet, automatically updating your device. Be the first to investigate what is happening inside BlackBerry Fully supports Android for work placement and supports your personal and work thinking when it is enabled by your administrator while maintaining strict data storage separation. apk Apk Games
